

Controlled Drugs Cabinets

Cabinets are manufactured to satisfy the latest UK government requirements for safe storage of controlled drugs and other substances. They have been designed specifically to meet the needs of retail pharmacy, doctors surgeries and hospital pharmacies and have been independently tested to ensure compliance. Constructed in 6mm thick steel plate the cabinets are, welded internally, and stiffened to create a very strong unit. The internal shelf/s are adjustable to allow for the storage of 5 litre and 500ml pharmacy bottles. (Twenty 500ml bottles can be stored within the FPD-3812 and sixty within the FPD-3814 cabinet.).

FPD-3814

FPD-3812

The 6 mm thick steel plate door is strengthened internally and set within the cabinet making jemmy attack very difficult. The door is secured by means of a multi point locking system and hardened silver steel hinge pins. Locking is operated by a handle and locked in place with a 7 lever mortise dead lock, a 5 mm thick steel dogging plate is welded internally to the door to prevent its removal should the hinges be attacked. All the cabinets are powder coated and oven baked in off white leatherette for a tough, long lasting finish. Cabinets are supplied hinged on the right (as you look at them) unless left hinge is specified.

- Made to meet the latest government requirements
- Design tested by an independent test house
- Manufactured in 6mm thick steel plate
- Adjustable shelves
- Multipoint locking
- Cabinets either meet or exceed testing to BS 2281.
